

## Contents

<b>Bresch D. and Koko J.</b> Operator-splitting and Lagrange multiplier domain decomposition methods for numerical simulation of two coupled navier-stokes fluids .....	419
<b>Rachik M., Lhous M., El Kahlaoui O., Labriji E. and Jourhmane H.</b> A quadratic optimal control problem for a class of linear discrete distributed systems .....	431
<b>Bochniak J., Gałkowski K., Rogers E. and Kummert A.</b> Robust stabilization of discrete linear repetitive processes with switched dynamics .....	441
<b>El Mouatasim A., Ellaia R. and Souza de Cursi J.E.</b> Random perturbation of the variable metric method for unconstrained nonsmooth nonconvex optimization .....	463
<b>Abdessemed F., Monacelli E. and Benmahammed K.</b> A learning paradigm for motion control of mobile manipulators .....	475
<b>Przewoźniczek M. and Walkowiak K.</b> Quasi-hierarchical evolution algorithm for flow assignment in survivable connection-oriented networks .....	487
<b>Michalak K. and Kwaśnicka H.</b> Correlation-based feature selection strategy in classification problems .....	503
<b>Strumiłło P. and Strzelecki M.</b> Application of coupled neural oscillators for image texture segmentation and modeling of biological rhythms .....	513
<b>Glentis G.-O. and Georgoulakis K.</b> Pipelined architectures for the frequency domain linear equalizer .....	525
<b>Moghrabi I.</b> Guided local search for query reformulation using weight propagation .....	537
<b>Aswani Kumar Ch. and Srinivas S.</b> Latent semantic indexing using eigenvalue analysis for efficient information retrieval .....	551
